Contents

Foreword ix

ENERGY-FILTERED DIFFRACTION, IMAGING AND MAPPING

Energy-filtered convergent-beam diffraction: examples and future prospects
P.A. Midgley, M. Saunders, R. Vincent and J.W. Steeds 1

Imaging of nanometer-sized precipitates in solids by electron spectroscopic imaging
F. Hofer, P. Warbichler and W. Grogger 15

Energy-filtered transmission electron microscopy of Si_mGe_n superlattices and Si–Ge heterostructures. I. Experimental results
W. Jäger and J. Mayer 33

Quantitative surface chemical mapping with Auger and backscattered electron signals
M. Prutton, I.R. Barkshire and M. Crone 47

NEAR-EDGE AND LOW-LOSS FINE STRUCTURES

Conduction bandstructure in strained silicon by spatially resolved electron energy loss spectroscopy
P.E. Batson 63

Cryo-electron energy loss spectroscopy: observations on vitrified hydrated specimens and radiation damage
R.D. Leapman and S. Sun 71

Modelling the bonding at metal–ceramic interfaces using PEELS in the STEM
R. Brydson, J. Bruley, H. Müllejans, C. Scheu and M. Rühle 81

Momentum dependent energy loss near edge structures using a CTEM: the reliability of the methods available
G.A. Botton, C.B. Boothroyd and W.M. Stobbs 93

Momentum-transfer resolved electron energy loss spectroscopy of solids: problems, solutions and applications
Y.Y. Wang, S.C. Cheng, V.P. Dravid and F.C. Zhang 109

EXELFS

Simulation of the extended fine structure of K-shell edges in intermetallic ordered alloys
G. Hug, G. Blanche, M. Jaouen, A.-M. Flank and J.J. Rehr 121

Development of the EXELFS technique for high accuracy structural information
M. Qian, M. Sarikaya and E.A. Stern 137

High spatial resolution extended energy loss fine structure investigations of silicon dioxide compounds
Z.W. Yuan, S. Csillag, M.A. Tafreshi and C. Colliex 149

QUANTIFICATION

Review of methods for calculating near edge structure
P. Rez, J. Bruley, P. Brohan, M. Payne and L.A.J. Garvie 159

Some practical consequences of the Lorentzian angular distribution of inelastic scattering
R.F. Egerton and K. Wong 169

The influence of plural scattering on EELS elemental analysis
D.S. Su, H.F. Wang and E. Zeitler 181

The resolution limit for elemental mapping in energy-filtering transmission electron microscopy
H. Kohl and A. Berger 191

Delocalization in inelastic scattering
D.A. Muller and J. Silcox 195

A quantitative approach for spatially-resolved electron energy-loss spectroscopy of grain boundaries and planar defects on a subnanometer scale
H. Gu, M. Ceh, S. Stemmer, H. Müllejans and M. Rühle 215

Analyzing line scan EELS data with neural pattern recognition
C. Gatts, G. Duscher, H. Müllejans and M. Rühle 229

Progress in electron Compton scattering
P. Schattschneider and A. Exner 241

INSTRUMENTATION

An imaging filter for high voltage electron microscopy
A.J. Gubbens, B. Kraus, O.L. Krivanek and P.E. Mooney 255

An imaging filter for biological applications
O.L. Krivanek, S.L. Friedman, A.J. Gubbens and B. Kraus 267

Measurement of TEM primary energy with an electron energy-loss spectrometer
C.E. Meyer, C.B. Boothroyd, A.J. Gubbens and O.L. Krivanek 283
